

Nuveen Short Duration High Yield Municipal Bond Fund

Marketing communication | As of 31 Mar 2025

Eligible for \$250,000
NAV purchase*

Average annualized total returns (%)

	Inception date	1 year	3 years	5 years	10 years	Since inception
Class I	01 Feb 13	3.98	2.66	3.66	3.27	3.49
Class A without sales charge	01 Feb 13	3.90	2.49	3.48	3.08	3.30
Class A with max. 2.5% charge	01 Feb 13	1.30	1.63	2.96	2.82	3.08
Class C	10 Feb 14	3.07	1.66	2.66	2.43	3.00
S&P Short Duration Municipal Yield Index		3.78	3.14	3.35	3.32	3.43
Morningstar High Yield Muni Cat. Avg		3.36	1.28	2.28	2.73	2.88

Performance data shown represents past performance and does not predict or guarantee future results. Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns without sales charges would be lower if the sales charges were included. Returns assume reinvestment of dividends and capital gains. For performance current to the most recent month-end visit nuveen.com. Performance shown for benchmark since inception is as of the Fund's oldest share class.

Class I shares have no sales charge and may be purchased by specified classes of investors. Class C shares have a 1% CDSC for redemptions within less than one year, which is not reflected in the one-year total return. Effective Jul 2018, Class C shares automatically convert to Class A shares during the month in which the 10-year anniversary (effective Mar 2021, this will change to 8-year anniversary) of the share purchase occurred. Since Inception returns for Class C shares for periods longer than 10 years reflect the performance of Class A shares after the deemed 10-year conversion to Class A shares within such periods.

Calendar year returns (%)

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025 YTD
Class I	0.36	8.11	3.40	7.89	-0.16	8.40	-7.06	3.50	7.23	0.44
Class A without sales charge	0.18	7.82	3.22	7.72	-0.34	8.21	-7.30	3.31	7.04	0.50

Morningstar High Yield Muni Cat. Avg	0.90	7.38	2.11	9.12	3.45	5.44	-13.71	6.48	4.95	-0.03

Expense ratios (%)

	Class I	Class A	Class C
Gross	0.87	1.07	1.87
Net	0.86	1.06	1.86
Adjusted expense ratio	0.60	0.80	1.60

Expense ratios are based on the Fund's most recent fiscal year end. The net expense ratio excludes credits earned on the Fund's cash on deposit with the custodian bank, if any, and reflects a contractual commitment by the Fund's investment adviser to waive fees and/or reimburse expenses through 31 Jul 2026. Absent the waiver and/or reimbursement, expenses would be higher and total returns would be less. Adjusted expense ratios excludes certain investment expenses, such as interest expense from borrowings. Please see the prospectus for details.

Overall Morningstar Ratings™

Category: 180 High Yield Muni funds

CLASS I ★★★★★

Morningstar ratings may vary among share classes and are based on historical risk-adjusted total returns, which are not indicative of future results.

Consumer Discretionary	1.5

1 The SEC 30-day yield is computed under an SEC standardized formula and is based on the maximum offer price per share. The Taxable-equivalent yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis at a specified tax rate. If the comparison were instead to investments that generate qualified dividend income, which is taxable at a rate lower than an individual's ordinary graduated tax rate, the Fund's Taxable-equivalent yield would be lower. The Taxable-equivalent yield is based on the Fund's SEC 30-day yield on the indicated date and a federal income tax rate of 40.8% (maximum federal income tax rate and the Medicare tax). Investors should consider their own tax rate when investing in municipal bonds. A negative SEC 30-Day Yield results when accrued expenses of the past 30 days exceeds the income generated during the past 30 days.

2 Ratings shown are the lowest rating given by one of the following national rating agencies: S&P, Moody's or Fitch. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC/CC/C and D are below-investment grade ratings. Holdings designated Not Rated are not rated by these national rating agencies.

3 Positions are subject to change. Positions of inverse floating rate securities, if any, show the amount of the residual inverse floater only, and not the amount of the underlying bond and any associated liability to the holder of the associated floating rate security, and therefore this presentation may not be fully consistent with generally accepted accounting principles.

* If you are investing \$250,000 or more, you may be eligible to purchase Class A shares of this Fund without a sales charge. However, redemptions within 18 months may be subject to sales charge. See the prospectus for more details.

Nuveen Short Duration High Yield Municipal Bond Fund As of 31 Mar 2025

Fund description

The Fund seeks high current income exempt from regular federal income taxes by investing in municipal bonds, a substantial portion of which may be rated below investment-grade, while maintaining a weighted average effective portfolio duration of less than 4.5 years. The Fund may opportunistically employ leverage through the use of inverse floating rate securities.

Morningstar rankings and percentiles

Morningstar High Yield Muni Category

	1 year		3 years		5 years		10 years	
	Rank	%	Rank	%	Rank	%	Rank	%
Class I	62/195	29	6/180	6	3/174	2	24/118	19
Class A	70/195	37	9/180	7	5/174	3	36/118	28
Class C	124/195	66	68/180	37	61/174	34	88/118	71

The Fund employs high yield strategies, including significant investment in below investment grade bonds and opportunistic use of portfolio leverage through investment in inverse floating rate securities, which other funds in its Morningstar Category may not have used to the same extent during certain periods. As a result, performance comparisons may be less meaningful. Morningstar ranking/number of funds in category displays the Fund's actual rank within its Morningstar Category based on average annual total return and number of funds in that Category. The returns assume reinvestment of dividends and do not reflect any applicable sales charge. Absent expense limitation, total return would be less. Morningstar percentile rankings are the Fund's total return rank relative to all the funds in the same Morningstar Category, where 1 is the highest percentile rank and 100 is the lowest percentile rank.

Important information on risk

Mutual fund investing involves risk; principal loss is possible. Debt or fixed income securities such as those held by the Fund, are subject to market risk, credit risk, interest rate risk, call risk, tax risk, political and economic risk, and income risk. As interest rates rise, bond prices fall. Credit risk refers to an issuer's ability to make interest and principal payments when due. The Fund concentrates in non-investment-grade and unrated bonds with shorter maturities and durations which carry heightened credit risk, liquidity risk, and potential for default. In addition, the Fund may engage in a moderate amount of portfolio leverage and in doing so, assumes a higher level of risk in pursuit of its objectives. Leverage involves the risk that the Fund could lose more than its original investment and also increases the Fund's exposure to volatility, interest rate risk and credit risk.

This material is not intended to be a recommendation or investment advice, does not constitute a solicitation to buy, sell or hold a security or an investment strategy, and is not provided in a fiduciary capacity. The information provided does not take into account the specific objectives or circumstances of any particular investor, or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with his or her financial professional.

For the period ended 31 Mar 2025, Morningstar rated this Fund's I shares, for the overall, three-, five-, and 10-year periods (if applicable). The Class I shares received 5, 5, 5, and 4 stars among 180, 180, 174, and 118 High Yield Muni Funds, respectively. These ratings are for Class I shares only; other classes may have different performance characteristics. Investment performance reflects applicable fee waivers. Without such waivers, total returns would be reduced and ratings could be lower. For the most current ratings, please visit nuveen.com.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star

rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©2025 Morningstar, Inc. Glossary

Average call protection is a provision in a bond's indenture setting a certain period of time during which the bond cannot be redeemed by the issuer. **Average effective maturity** is the weighted average of the effective maturity dates of the fixed-income securities in the Fund's holdings. A bond's effective maturity takes into account the possibility that it may be called by the issuer before its stated maturity date. In this case, the bond trades as though it had a shorter maturity than its stated maturity. **Effective duration** is for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change. This measures the responsiveness of a bond's price to interest rate changes, and illustrates the fact that the embedded option will also affect the bond's price. **Inverse floating rate securities** are derivative securities designed to produce high levels of tax-exempt income representing the difference between interest paid on an underlying municipal bond and short-term interest rates, less certain expenses, times a leverage ratio. This income varies inversely with the short-term rates based on the leverage ratio. Inverse floating rate securities also result in the Fund experiencing leveraged exposure to both upward and downward changes in the value of the underlying bonds. **Leverage** is created whenever a fund has investment exposure (both reward and/or risk) equivalent to more than 100% of the investment capital.

S&P Short Duration Municipal Yield Index is an index that consists of bonds maturing in 1 to 12 years and is structured so that 70% of the index consists of bonds that are either not rated or are rated below investment grade, 20% are rated BBB/Baa, and 10% are rated single A. Index returns assume reinvestment of distributions, but do not reflect any applicable sales charges or management fees. **It is not possible to invest directly in an index.**
